Ur-Energy Releases 2014 Q3 Financial Results

Littleton, Colorado (PR Newswire – November 3, 2014) **Ur-Energy Inc. (TSX:URE, NYSE MKT:URG)** (“Ur-Energy” or the “Company”) announces it has filed the Company’s Form 10-Q for the quarter ended September 30, 2014 with the U.S. Securities and Exchange Commission at www.sec.gov/edgar.shtml and with Canadian securities authorities on SEDAR at www.sedar.com. Our filing also may be accessed on the Company’s website at www.ur-energy.com.

During Q3 2014, 131,331 pounds of U₃O₈ were captured within the Lost Creek plant. Of that, 125,915 pounds of U₃O₈ were packaged in drums and 126,499 pounds of the packaged inventory were shipped out of the Lost Creek processing plant. The quarter included product sales of 100,000 pounds U₃O₈ for revenues of \$6.0 million. The product was sold under contractual terms at a price of \$59.96 per pound, which represents a 92% premium to the \$31.17 average spot market price during the quarter. The Company recorded production cash costs of \$23.29 per pound sold this quarter compared with \$20.56 during the previous quarter. The total cost per pound sold including all non-cash components was reported at \$37.52 (see table below). As many of our costs are fixed in nature and not related to production levels, slightly lower plant production during the quarter resulted in a higher average cost per pound and the related cost per pound sold was also higher. We would expect to see the cost per pound sold decrease in 2014 Q4 as production levels are anticipated to rise to approximately 150,000 pounds.

At September 30, the Company’s cash position was \$3.4 million and we had \$6.1 million in accounts receivable. We received the \$6.1 million in October. Our current cash position is \$4.5 million. The Company anticipates selling 100,000 pounds of U₃O₈ in 2014 Q4 at an average price of \$66 per pound for cash proceeds of \$6.6 million.

Wayne Heili, President and CEO of Ur-Energy, commented, “Throughout the first full year of production at Lost Creek, the project has been able to achieve operating costs on the lowest end of uranium ISR cost metrics. Our cost profile, in combination with our advanced product marketing strategy, has led us to realize industry-leading margins on our product sales. While we maintain our posture of producing for and selling exclusively into term contracts, we also recognize that the uranium spot price is up 28% over the past three months. The operational flexibility of the Lost Creek ISR Project allows for the opportunity to quickly initiate a spot market sales strategy if uranium pricing continues the upward trajectory.”

During the nine months ended September 30, 2014, 446,612 pounds of U₃O₈ were captured within the Lost Creek plant. 430,832 of those pounds were packaged in drums and 460,462 pounds of the packaged inventory were shipped to a conversion facility where 417,760 pounds were sold to utility customers for sales revenues of \$19.9 million. In addition, the Company recognized sales of \$1.2 million and \$2.5 million for the three and nine months ended September 30, 2014, respectively, from the delivery during the period by a third party of 200,000 pounds of uranium under contractual delivery commitments assigned to that third party in 2013.

Production levels and costs along with sales figures for the Lost Creek Project are presented in the following table:

Inventory, Production and Sales	Unit	2014 Q3	2014 Q2	2014 Q1	Year to date

Notes:

- 1 Wellfield costs include all wellfield operating costs, severance and ad valorem taxes plus amortization of the related mineral property acquisition costs and depreciation of the related asset retirement obligation costs. Wellfield construction and development costs, which include wellfield drilling, header houses, pipelines, power lines, roads, fences and disposal wells, are treated as development expense and are not included in wellfield operating costs.
- 2 Plant costs include all plant operating costs, site overhead costs and depreciation of the related plant construction and asset retirement obligation costs.
- 3 Distribution costs include all shipping costs and costs charged by the conversion facility for weighing, sampling, assaying and storing the U₃O₈ prior to sale. There are no non-cash costs associated with distribution.
- 4 There were no spot sales in the nine months ended September 30, 2014.
- 5 Cost of sales include all production costs (notes 1, 2 and 3) adjusted for changes in inventory values.

Cash cost per pound and non-cash cost per pound for produced and sold U₃O₈ presented in the table above are non-US GAAP measures. These measures do not have a standardized meaning or a consistent basis of calculation under US GAAP. These measures are used to assess business performance and may be used by certain investors to evaluate the Company's extraction and processing performance. To facilitate a better understanding of these measures, the table below presents a reconciliation of these measures to the financial results as presented in our financial statements.

Sales per the statement of operations include revenue from sources other than the sale of U₃O₈. The sales footnote in the financial statements separates the U₃O₈ sales from other revenues.

Average Price Realized Per Pound Reconciliation	Unit	2014 Q3	2014 Q2	2014 Q1	Year to date
U ₃ O ₈ Sales (a) ¹	\$000	\$5,996	\$7,197	\$6,723	\$19,916
Pounds sold (b)	lb.	100,000	207,760	110,000	417,760
Average price realized per pound (a ÷ b)	\$/lb.	\$59.96	\$34.64	\$61.12	\$47.67

Notes:

- 1 Does not include \$2.5 million recognized from the gain on assignment of deliveries under long-term contracts because the additional revenue would distort the average realized price per pound.

Cautionary Note Regarding Forward-Looking Information

This release may contain "forward-looking statements" within the meaning of applicable securities laws regarding events or conditions that may occur in the future (*e.g.*, whether our costs per pound will decrease as sales increase as currently foreseen; whether we will be able and choose to deliver into a spot sale if the spot market continues to strengthen; timing and completion of ramp-up of operations to name plate operations) and are based on current expectations that, while considered reasonable by management at this time, inherently involve a number of significant business, economic and competitive risks, uncertainties and contingencies. Factors that could cause actual results to differ materially from any forward-looking statements include, but are not limited to, capital and other costs varying significantly from estimates; failure to establish estimated resources and reserves; the grade and recovery of ore which is mined varying from estimates; production rates, methods and amounts varying from estimates; delays in obtaining or failures to obtain required governmental, environmental or other project approvals; inflation; changes in exchange rates; fluctuations in commodity prices; delays in development and other factors described in the public filings made by the Company at www.sedar.com and www.sec.gov. Readers should not place undue reliance on forward-looking statements. The forward-looking statements contained herein are based on the beliefs, expectations and opinions of management as of the date hereof and Ur-Energy disclaims any intent or obligation to update them or revise them to reflect any change in circumstances or in management's beliefs, expectations or opinions that occur in the future.
